

Saving your Schedule in MyDailySchedule

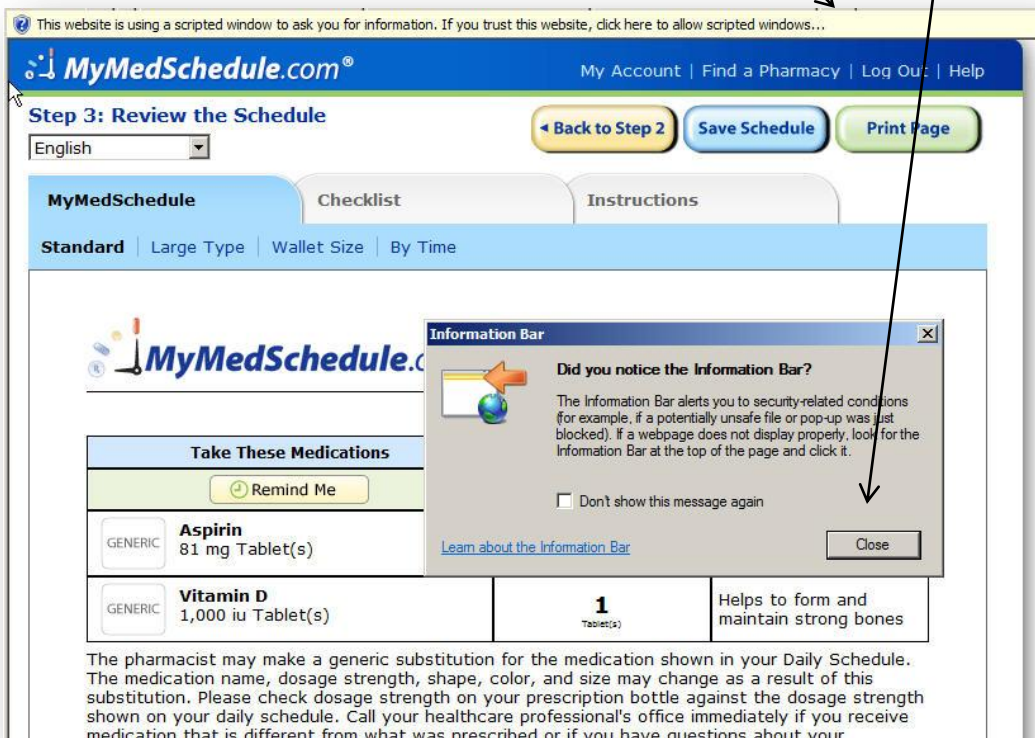

In **Step 3** **Click**

If you receive, an error message and possibly a Windows information bar, **Follow these instructions:**

Information Bar:
Click Close

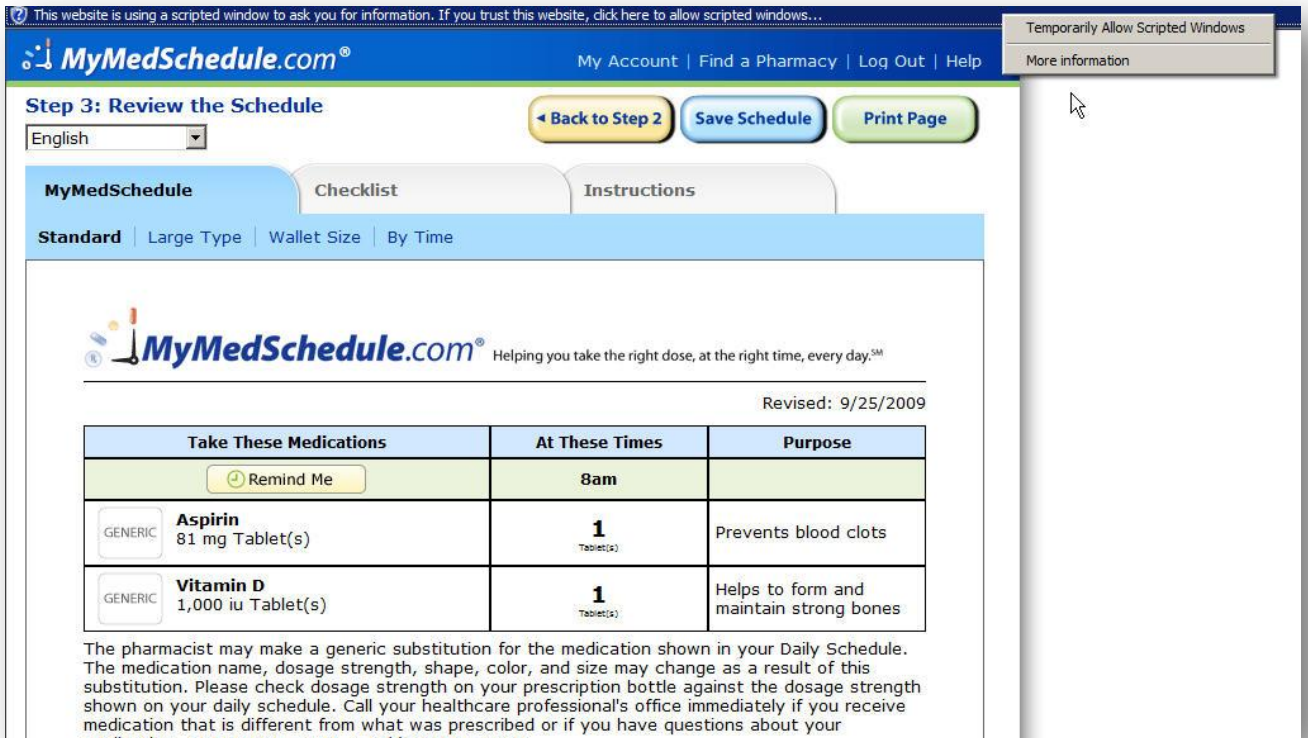

Error Message:
Click next to the word windows on the error message.

Saving your Schedule in MyDailySchedule

After you click next to the word windows you will see a pop up that says "Temporarily Allow Scripted Windows"

You **must Click** on temporarily allow scripted windows.

The screenshot shows the MyMedSchedule.com website interface. At the top, a blue banner contains the site logo and navigation links: "My Account | Find a Pharmacy | Log Out | Help". Below the banner, the page title is "Step 3: Review the Schedule". A language dropdown menu is set to "English". Three buttons are visible: "Back to Step 2" (yellow), "Save Schedule" (blue), and "Print Page" (green). A "Temporarily Allow Scripted Windows" pop-up is open in the top right corner, with a "More information" link. The main content area has tabs for "MyMedSchedule", "Checklist", and "Instructions". Below these are options for "Standard", "Large Type", "Wallet Size", and "By Time". The MyMedSchedule logo and tagline "Helping you take the right dose, at the right time, every day.™" are displayed, along with a "Revised: 9/25/2009" date. A table with three columns: "Take These Medications", "At These Times", and "Purpose" is shown. A "Remind Me" button is located above the first row of the table.

Take These Medications	At These Times	Purpose
	8am	
<small>GENERIC</small> Aspirin 81 mg Tablet(s)	1 <small>Tablet(s)</small>	Prevents blood clots
<small>GENERIC</small> Vitamin D 1,000 iu Tablet(s)	1 <small>Tablet(s)</small>	Helps to form and maintain strong bones

The pharmacist may make a generic substitution for the medication shown in your Daily Schedule. The medication name, dosage strength, shape, color, and size may change as a result of this substitution. Please check dosage strength on your prescription bottle against the dosage strength shown on your daily schedule. Call your healthcare professional's office immediately if you receive medication that is different from what was prescribed or if you have questions about your medication.

Now that you have allowed scripted windows you need to:

Click

Saving your Schedule in MyDailySchedule

An Explorer User Prompt will pop up:

Enter a **name** in the box and **Click OK**.

The screenshot shows a web browser window with an Explorer User Prompt dialog box. The dialog box contains the following text:

Script Prompt:
Press OK to save your schedule with this name or enter another.
The date and time will be added automatically.

Below the text is an empty text input field. An arrow points from the instruction 'Enter a name in the box' to this field. To the right of the input field are 'OK' and 'Cancel' buttons.

The background page is titled 'Step 3: Review the Schedule' and features a navigation bar with 'MyMedSchedule.com' and links for 'My Account', 'Find a Pharmacy', and 'Log Out'. Below the navigation bar are buttons for 'Back to Step 2', 'Save Schedule', and 'Print'. A dropdown menu is set to 'English'. Below this are tabs for 'MyMedSchedule', 'Checklist', and 'Instructions'. A secondary navigation bar includes 'Standard', 'Large Type', 'Wallet Size', and 'By Time'. The main content area displays the MyMedSchedule.com logo and the tagline 'Helping you take the right dose, at the right time, every day.™'. A 'Revised: 9/25/2' date is shown. At the bottom, a table is partially visible:

Take These Medications	At These Times	Purpose
Remind Me	8am	

Until you receive the Explorer user prompt and you click OK your schedule is not saved.
